

EARTH'S SPHERES

24

Match the Earth's Spheres to their names

☐

Geosphere

☐

Atmosphere

☐

Hydrosphere

Read the descriptions and write the names of the correct spheres

BIOSPHERE

HYDROSPHERE

ATMOSPHERE

GEOSPHERE

The solid part of the Earth: the continents, islands, mountains and the land at the bottom of rivers, lakes and oceans.

All living things on Earth. Plants and animals are part of this sphere. It includes producers, consumers and decomposers.

The mass of gases surrounding our planet. It is a mixture of several gases that includes oxygen.

All the water on our planet: rivers, oceans, lakes, underground water, polar ice, glaciers and water vapor.
